

# Eurekos LMS

## Real-time compliance and increased productivity

Achieve 100% compliance with insightful, real-time analytics

Access a library of courses that can be customized and integrated with your content

Identify and close skills gaps in record time

Administering training programs for hundreds or even thousands of learners is extremely complicated and the demands for personalized, just-in-time training can overwhelm any training department.

Fortunately, the Eurekos LMS offers modern tools to track compliance, personalize learner tracks and deliver customized content, just-in-time—when learners need it.

### Key Features

#### Learning Analytics

Deliver insightful analytics for real-time compliance and productivity. Empower learners to track their progress and identify and address their own skills gaps.

#### Content Marketplace

The Content Hub consolidates courses and resources from various internal and external sources, making it fast and easy for learners to find content—just in time.

#### Course Administration

Easily identify skills gaps, customize learning paths, and prescribe training by interest, role, level of expertise and other personalized learning objectives.

#### eCommerce

A simplified approach to enterprise eCommerce with auto-signup, group enrollment, multiple secure payment methods, tax support, and a fully-integrated booking system.

# Content Marketplace

Eurekos provides you with expertise you can trust. Accredited course materials assure high quality content. You are assured rapid course development with

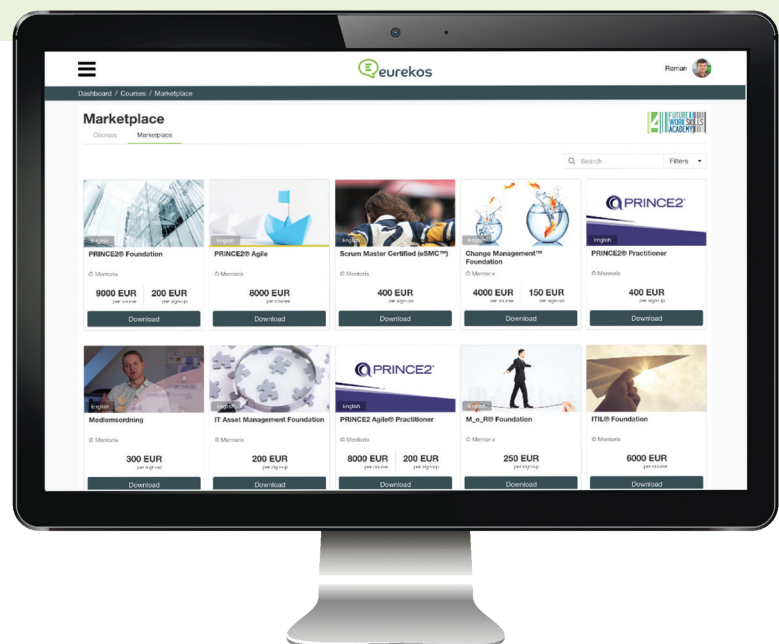

a complete training catalog that includes standardized, adapted, and personalized content. The Eurekos LMS would not be complete without a comprehensive suite

of visual, analytics tools to help you track content usage, progress, costs and more.

**Access a library of courses** that can be customized and integrated with your content.

Eurekos manages a community of partners from around the world to create engaging and high-quality, interactive content for you.

Content is downloaded directly from the Content Marketplace Community and made available inside the training catalog. Since courses are editable, you can download standard courses and edit out parts that you don't suit your needs and include content modules and streaming video from various existing sources. There is no need for additional software—everything is done through a standard internet browser.
